7. DOUBTS AND QUESTIONS

1. INTRODUCTION

1. INTRODUCTION

1.1 Introduction to transmission devices

Almost all security data generated are transmitted via the Ethernet protocol, whether CCTV images, access controls, etc.

The importance of good communications infrastructure is critical Ethernet, to ensure that the information generated by the various devices is sent over the network in complete safety.

KTI Networks designs and manufactures switches and converters since 1983, being one of the leaders in the market Networking Industrial thanks to the expertise it has.

1. INTRODUCTION

1.2 Basics

KTI Networks: It offers a wide range of products designed to cover any needs. But before we clarify the nomenclature we use in this presentation.

Fast Ethernet: It is a standard Ethernet transmission where the maximum is 100Mbps.

Giga Ethernet: It is the standard where maximum 1000Mbps or 1Gbps speeds are achieved, and the cable installed must be cat5e or cat6.

PoE: Power over Ethernet is a standard which can power devices through the cabling infrastructure computer network without exceeding the standard 100m. We must bear in mind that the PoE standard CCTV is a voltage of 48Vdc and power (W) depend on each switch, PoE injector or independent (and can reach 90W).

Slots or ports: All devices connected to a LAN or WAN ports or mouths have, in the case of two switch vary, even tens, may be copper (RJ45) speeds Fast or Giga Ethernet and **SFP** which are inserted ports where a Transceivers to connect the computers through optical fiber.

1. INTRODUCTION

1.2 Basics

Fiber (MM / SM): Besides copper cable, for decades it used and increasingly, fiber optics as means of transmission of signals and data as it can achieve a higher rate of information transfer, greater distance without intermediate devices, and is immune to electromagnetic interference. Two types exist, **MultiMode** or **SingleMode** (Monomode).

Layer or L2 / L2 +: Depending on the level of management we need for each installation, we choose devices or L2 + L2. The difference between each of these levels lies in the features available when your configuration. Our teams L2 and L2 + allow installations star and ring. Within management options, there are a lot of protocols that can be adjusted for optimal network performance.

VLAN: Within the typology and way of doing or physically interconnect the network described above, it can be segmented logically separated networks and can set their routes through the switch.

1. INTRODUCTION

1.2 Basics

Visual examples explained.

Type star

Ring type

1. INTRODUCTION

1.2 Star configuration

Switches have a function of interconnecting several devices, such as shown in the following example: Industrial Building. Switches need to control the entire operation of the warehouse, which can be distributed across multiple switches, from the main switch. Which in turn can be connected through another switch by Fiber optic headquarters, located at a great distance and provide service to the electronics necessary.

* Some of the most common applications are: Industrial buildings, airports, sports complexes, seaports ...

1. INTRODUCTION

1.2 Ring configuration

Switches have a function of interconnecting several devices, such as shown in the following example: Solar Parks.

Need to control switches solar panels to control the security camera enclosure, for the operation of the safety barrier and finally a switch that connects the various switches with main one.

* Some of the most common applications are: Eólicas plants, industrial buildings, warehouses, railway stations ...

1. INTRODUCTION

1.3 Why use the SWITCH KTI Networks?

1

High quality devices

3

Industrial design

2

optimal performance for CCTV

4

Stress tests

1. INTRODUCTION

1.3 Why use the SWITCH KTI Networks?

1

High quality devices

KTI's commitment to security installations is maximum, guaranteeing the high quality of their devices running CCTV connections in any environment.

5 Controls Quality

High quality

Flow control

1. INTRODUCTION

1.3 Why use the SWITCH KTI Networks?

3

Industrial design

KTI switches are designed to work in harsh and hostile environments, supporting a high-level power supply and extreme temperatures, providing no moving parts and options to attach it to any surface.

There are even devices with IP65 / IP67 protection allows installed outdoors without cabinet.

1. INTRODUCTION

1.3 Why use the SWITCH KTI Networks?

4

Stress tests

Of the five quality controls carried KTI, four of them spend 100% of devices and only one of them is random.

Each unit that leaves our factory has passed the toughest tests that will allow them to reach up to 429,428 MTBF hours of full operation without failure.

2. PoE SOLUTIONS

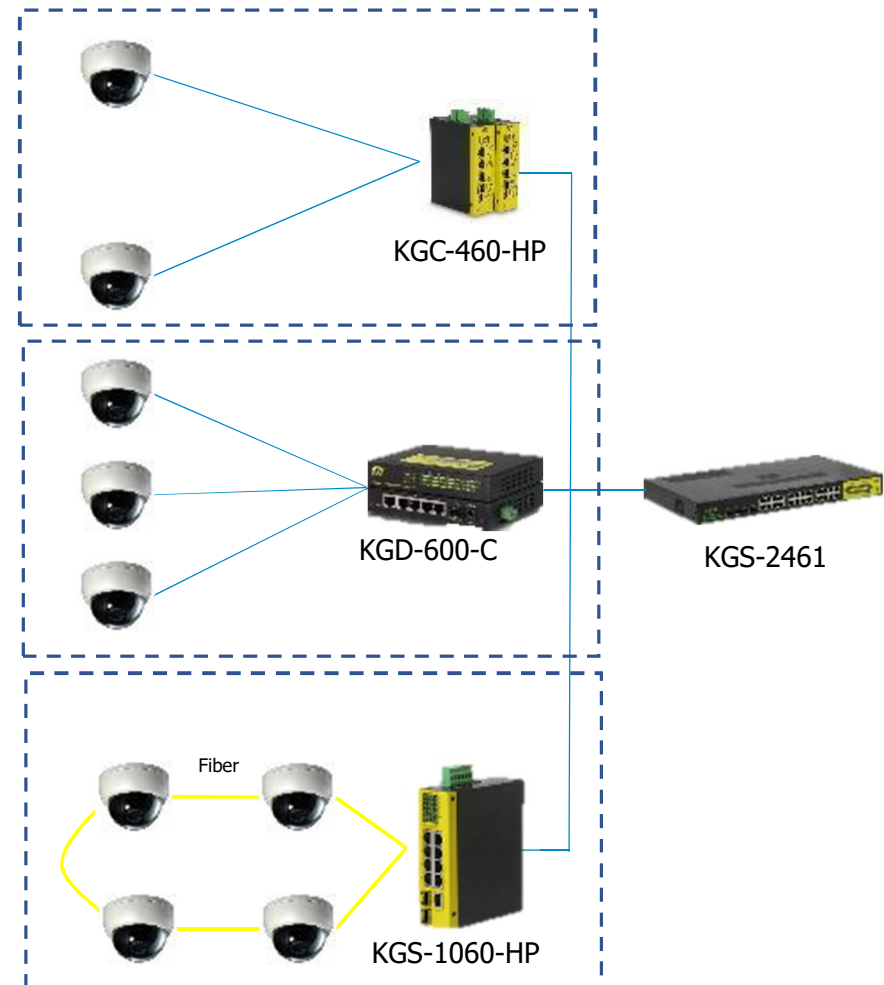

2. PoE SOLUTIONS

2.1 Introduction PoE Switch

KTI separates its product range depending need or scaling installation, classifying according to the following parameters:

- Manageable
- PoE
- Fiber Optics
- With the possibility of ring
- Outdoor & indoor

2. PoE SOLUTIONS

2.2 Gama PoE

KTI Product Information: KGS-1060-HP

Industrial range

- High Electrical Protection
- Wide temperature range
- Industrial electronics

Standard PoE

- IEEE 802.3, 802.3ab, 802.3z, 802.3x, 802.1x, 802.1w, 802.1D, 802.1Q, 802.3at, 802.3af

Video Supported

- QoS - 8 QoS classes, Tag-based & DSCP-based classification

KGS-1060-HP

1 * Console

8 * 10/100 / 100M RJ-45-8
PoE PSE + ports

2 * 100 / 1000M (SFP)

2. PoE SOLUTIONS

2.2 Gama PoE

Product information KTI: KGS-1260 / I (Manageability)

Industrial range

High Electrical Protection
Wide temperature range
Industrial electronics

Standard PoE

IEC 61850-3, IEEE 1613, IEEE 802.3, 802.3ab, 802.3z, 802.3x, 802.1x, 802.1w, 802.1D, 802.1Q

Video Supported

QoS, 802.1Q / MAC-based / Protocol-based / Private / IP subnet VLAN, Port Isolation

2. PoE SWITCH

2.2 Gama PoE

KTI Product Information: KGS-1064-HP

Industrial range

- High Electrical Protection
- Wide temperature range
- Industrial electronics

Standard PoE

IEEE 802.3at, IEEE 802.3, 802.3ab, 802.3z, 802.3x, 802.3at, 802.1x, 802.1w, 802.1D, 802.1Q

Video Supported

QoS, 802.1Q / MAC-based / Protocol-based / Private / IP subnet VLAN, Port Isolation

2. PoE SWITCH

2.3 PoE Solutions - Example

Type star

Ring type

2. PoE SOLUTIONS

2.3 PoE Solutions - Example

KTI Product Information: KGS-1260 / I

- Designed especially for environments of electrical substations
- Effective CCTV environments
- Legislation complies with IEC 61850-3 & power stations IEEE 1613
- -30 ° C ~ + 70 ° C wide temperature range

The KGS-1260 is a Gigabit Ethernet industrial switch manageable 12 ports. Its 4 FO ports allow you to be in a ring and also connect more than 2 devices at distances greater than 100m. The solid and fully sealed metal housing design, fanless and efficient heat dissipation at the surface, facilitate the transmission of video and data in environments from -30 to +70.

2. PoE SWITCH

2.4 Switch and injectors PoE

Gigabit Switch Range PoE and injectors PoE.

KSD-541-HP

Industrial 5-port L2 Fast Ethernet Switches with 1 SFP Slot PoE + PSE and 4 Ports

KGS-2422-B

Managed 24-Port Modular L2 / L3 Gigabit Ethernet 100BASE-FX Switches With Support

KGS-0800-4HP

8-port Gigabit Ethernet Switch with 4 PoE + PSE Ports

KGS-0800-4HP

Industrial Managed 10-Port L2 Gigabit Ethernet Switches with 2 dual-speed SFP Slots and 4 PoE + PSE Ports

KGS-086x Series

IP65 / 67 Managed Gigabit Ethernet and Fast Ethernet L2 + PoE Switches With Options

KPOE-200

Industrial High-Power Single-Port Mid-span PoE Injector ++

KPW-T4SP

Industrial High Power PoE Splitter ++

KPW-T2P25

Industrial IEEE 802.3at High Power PoE Splitter

KPOE-800-HP

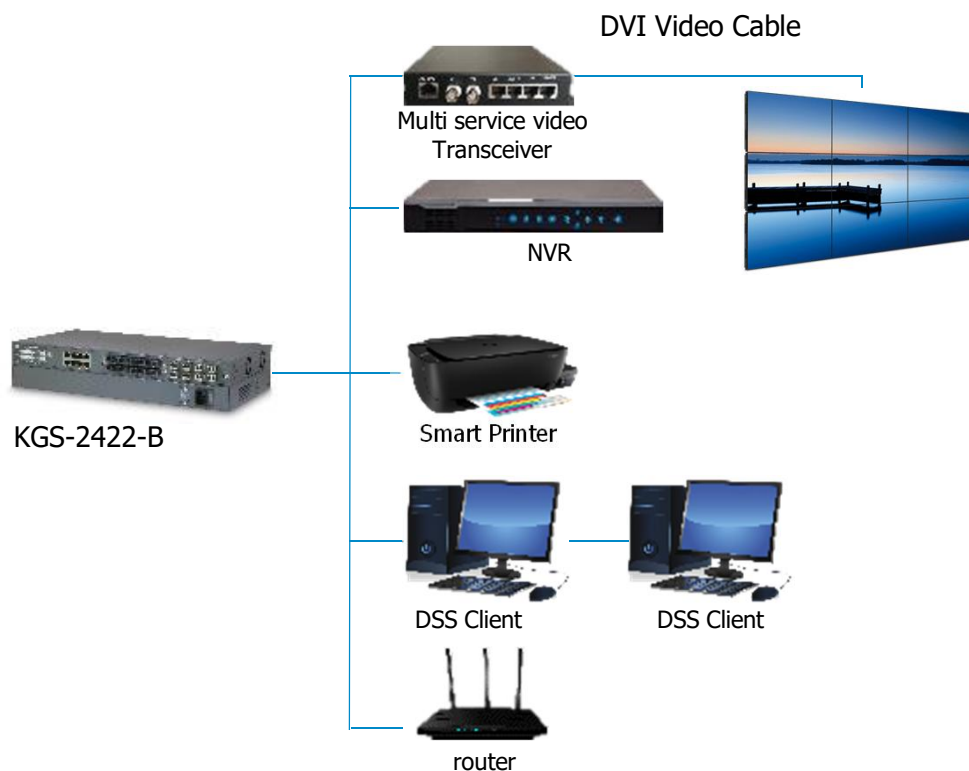

Industrial 8-port mid-span Power over Ethernet Injector

3. SWITCH MODULAR

3. SWITCH MODULAR

3.1 Switch modular

KTI offers a wide range of products to suit the need or scaled installation.

The KGS-2422-B is a modular switch, we can set our step, choosing the number of ports copper / fiber and the speed (10/100/1000 / 10G).

In this way we can have up to 24 ports FO, it is an increasingly demanded requisitioned.

Certainly a new strategy at the request of customers that opens a lot of business to the letter.

3. SWITCH MODULAR

3.1 Options modular switch

Modular switch options KGS-2422-B:

- Gigabit Ethernet switch modular L2 / L3 24 ports supporting 100Base-FX
- Combine multitude of options
- Unique feature allows to install modules 10Gb

KGS-2422-B-x-24F-T
24 x 100M MM ST

KGS-2422-B-x-24F-C
24 x 100M MM SC

KGS-2422-B-x-24F-SL2
24 x 100M SM SC

KGS-2422-B-x-2U22F-T
22 x 100M MM ST
+ 2 Uplink copper

KGS-2422-B-x-2U22F-C
22 x 100M MM SC
+ 2 Uplink copper

KGS-2422-B-x-2U22F-SL2
22 x 100M SM SC
+ 2 Uplink copper

KGS-2422-B-x-24G
24 x 100/1000M SFP

KGS-2422-B-x-4U20G
20 x 100/1000M SFP
+ 4 Uplink copper

KGS-2422-B-x-8U16G
16 x 100/1000M SFP
+ 8 Uplink copper

3. SWITCH MODULAR

3.2 Range modular switch

KTI Product Information: KGS-2461 & KGS-2422

KGS-2461

KGS-2422-B

Interconnections

20x10 / 100 / 1000Mbps Gigabit copper port
4x10 / 100 / 1000Mbps copper & SFP Combo port

Interconnections

24x10 / 100 / 1000Base-FX copper Gigabit port
Fully modular design with 3x8-port module slots

Features

Provides L2 Gigabit switching at full wire speed
Provides L3 switching functions for IPv4 / IPv6

Features

Provides L2 Gigabit switching at full wire speed
Provides L3 switching functions for IPv4 / IPv6

Management

Web / Telnet / SSH / HTTPS / SNMP / CLI
interfaces

Management

Web / Telnet / SSH / HTTPS / SNMP interfaces

4. Small Form-Factor Pluggable (SFP)

4. SFP

4.1 Module SFP

KTI provides a variety of optional Small Form-Factor Pluggable (SFP), also known as Mini-GBIC Transceivers for switches equipped with SFP connectors.

It has sufficient for performing any installation or project variety.

Single-Mode : Transmit information via an optical wave.

Multi-Mode: Transmit the information by several optical waves.

4. SFP

4.1 Range modules SFP

SFP modules for different types of fiber optics.

Single-mode

SFP-10G-ER-A

10G Single-mode SFP +, 1550nm, LC, 40km, DDM

SFP-GLS-110-A

Gigabit Single-mode SFP, 1550nm, LC, 110km

SFP-GLSD-70A-A

Gigabit Single-mode SFP, 1550nm, LC, 110km

All SFP modules

They work with a wide range of temperature from -
40 ° C ~ + 85 ° C

Multi-mode

SFP-10G-ER-A

10G Multi-mode SFP +, 850nm, LC, 300m *one, DDM

SFP-GLM-AA

Industrial Gigabit Multi-mode SFP, 850nm, LC, 550m

SFP-GLMD-A

Gigabit Multi-mode SFP, 850nm, LC, 550m, DDM

*one OM3 Fiber

5. ACCESSORIES

5. ACCESSORIES

5.1 Introduction Accesories

Safety deposit boxes, wall mounting brackets, magnetic plates: the perfectly matched accessories increase the possible applications of the KTI products.

PCI Adapters: PCI cards for desktops

Brackets: fasteners Rack, Din-Rail and Wall

Chassis: To converters Fiber Optic copper management and sharing redundant power supply

Plastic of Fiber (POF): range switches and converters for plastic fiberoptic

5. ACCESSORIES

5.2 Range accessories

PCI Adapter

KG-500F-B

1000BASE-X Gigabit Ethernet PCI Adapters With SFP Support

KF-221FX-C

1000Base-FX Fast PCI Ethernet Adapter

KF-221FX-C

10/100 / 1000Base-T Gigabit Ethernet PCI Adapter

Supports

KSD-6PB

Panel mounting for:
KGD-600, KSD-541, KSD-541-P

PMB-241

Panel mounting for:
KFC-241

WMB-0820

Wall mounting for:
KFS-2621, KS-1080, KGS-0820,
KPOE-800

Chassis

KCR-4MC

4-Slot Media Converter Chassis 1U for
19 "Rack Installation

KC-1300

Managed Media Converter Chassis
Center

POF (Plastic Fiber)

KCD-303P-A

Industrial 3-Port Fast Ethernet Media
Converter POF Switches

KCD-303P-B

Industrial 3-Port Fast Ethernet Media
Converter POF Switches

5. ACCESSORIES

5.3 Switch & Converters Introduction

KTI has a trading range *entry level* in response to indoor installations. The range of options is as wide as in the industrial area and with the same quality.

5. ACCESSORIES

5.4 Range switch & Converters

Standard switch

KGS-810F-B

Web Smart 8-port L2 Gigabit Ethernet Switch With one GbE SFP Port

KGS-500

5-Port 10/100 / 1000Base-T Gigabit Ethernet Switch L2

KGS-510F-D

6-Port Managed L2 Gigabit Ethernet Switches with 1 dual-speed SFP Slot

KS-108F-B

7-Port 10/100 Fast Ethernet L2 Switches with 1 Fiber Connection

KS-115FM-V

Web Smart Managed 4-port 10/100 L2 Fast Ethernet Switches with 1 Fiber Connection

KS-117FM-V

Web Smart Managed L2 6-Port 10/100 Fast Ethernet Switches with 1 Fiber Connection

Standard converter

KGC-311

Multimode to Single Mode Optical Fiber Media Converters

KGC-200

10/100 / 1000Base-T to Dual-speed Fiber Media Converters

KGC-300

1000Base-T to 1000Base-X Gigabit Media Converters

KC-300D

10 / 100Base-TX to 100Base-FX Media Converters

KGC-310M-C

Managed 10/100 / 1000Base-T to Dual-speed Fiber Media Converters

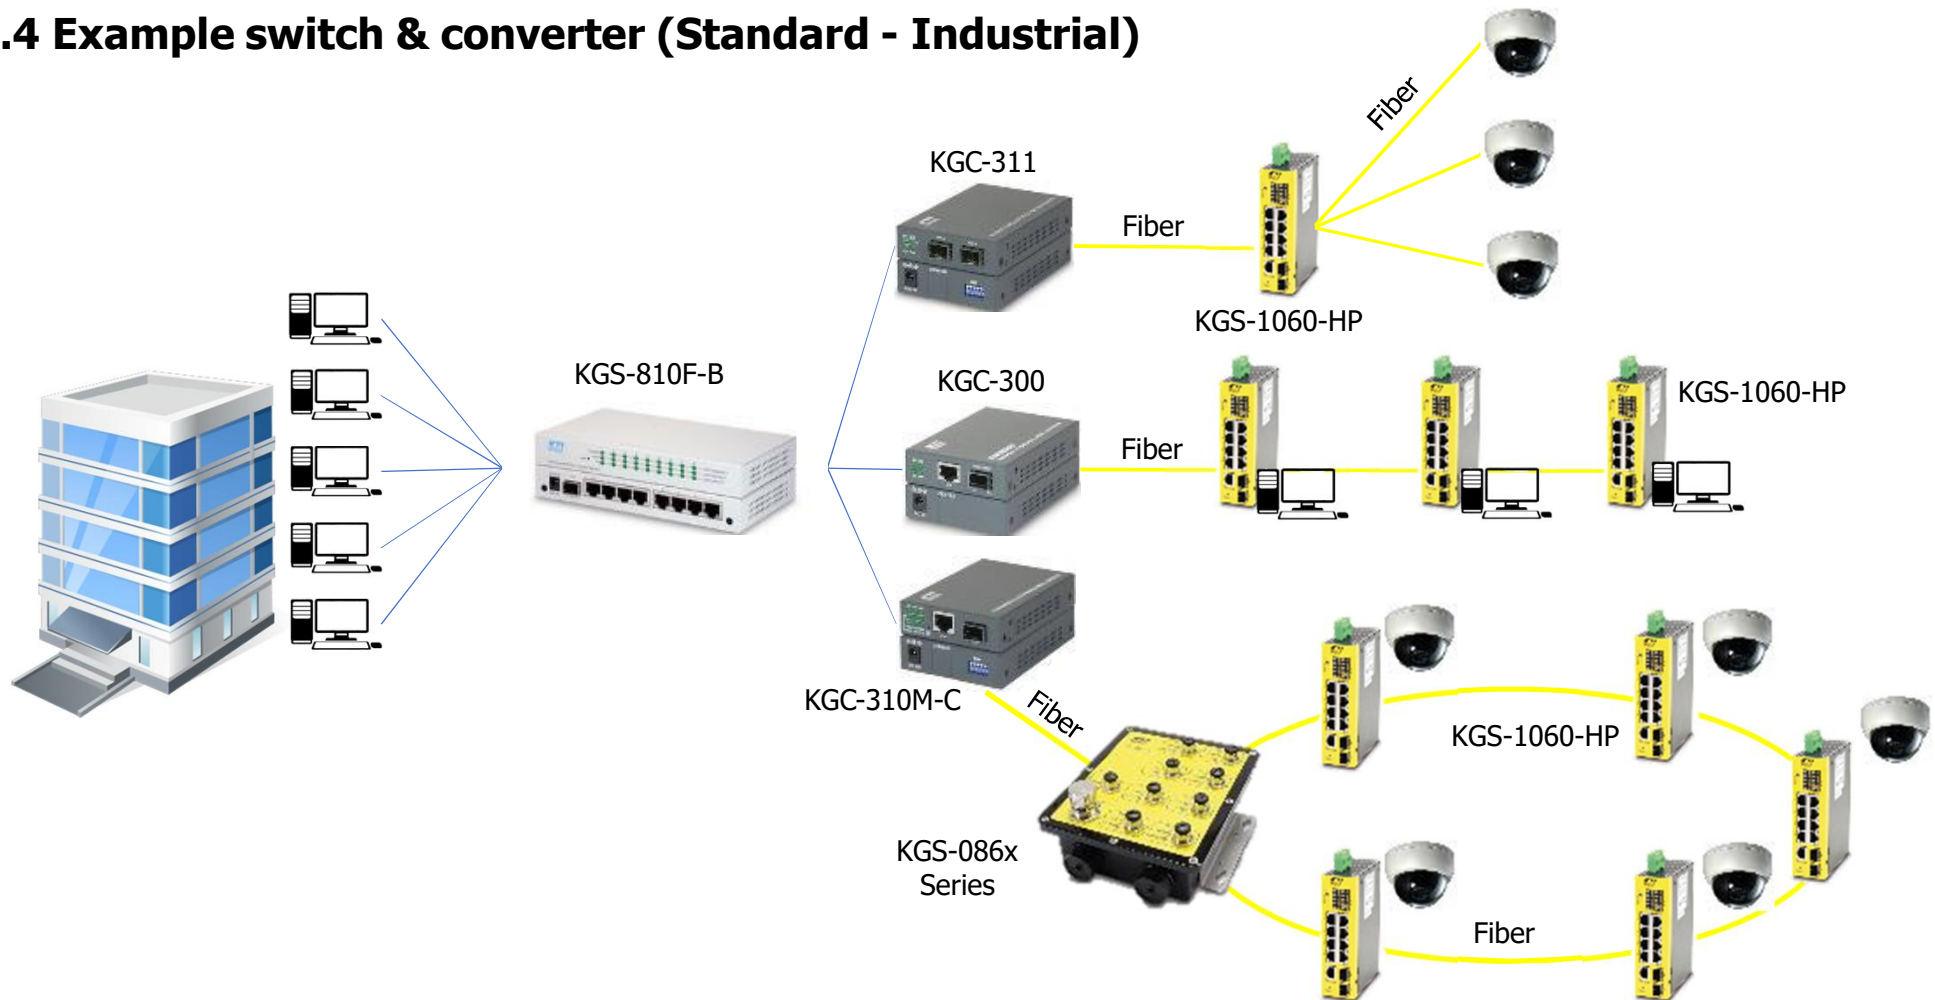

KFC-200-B

10 / 100Base-TX to 100Base-FX Media Converters

5. ACCESSORIES

5.4 Example switch & converter (Standard - Industrial)

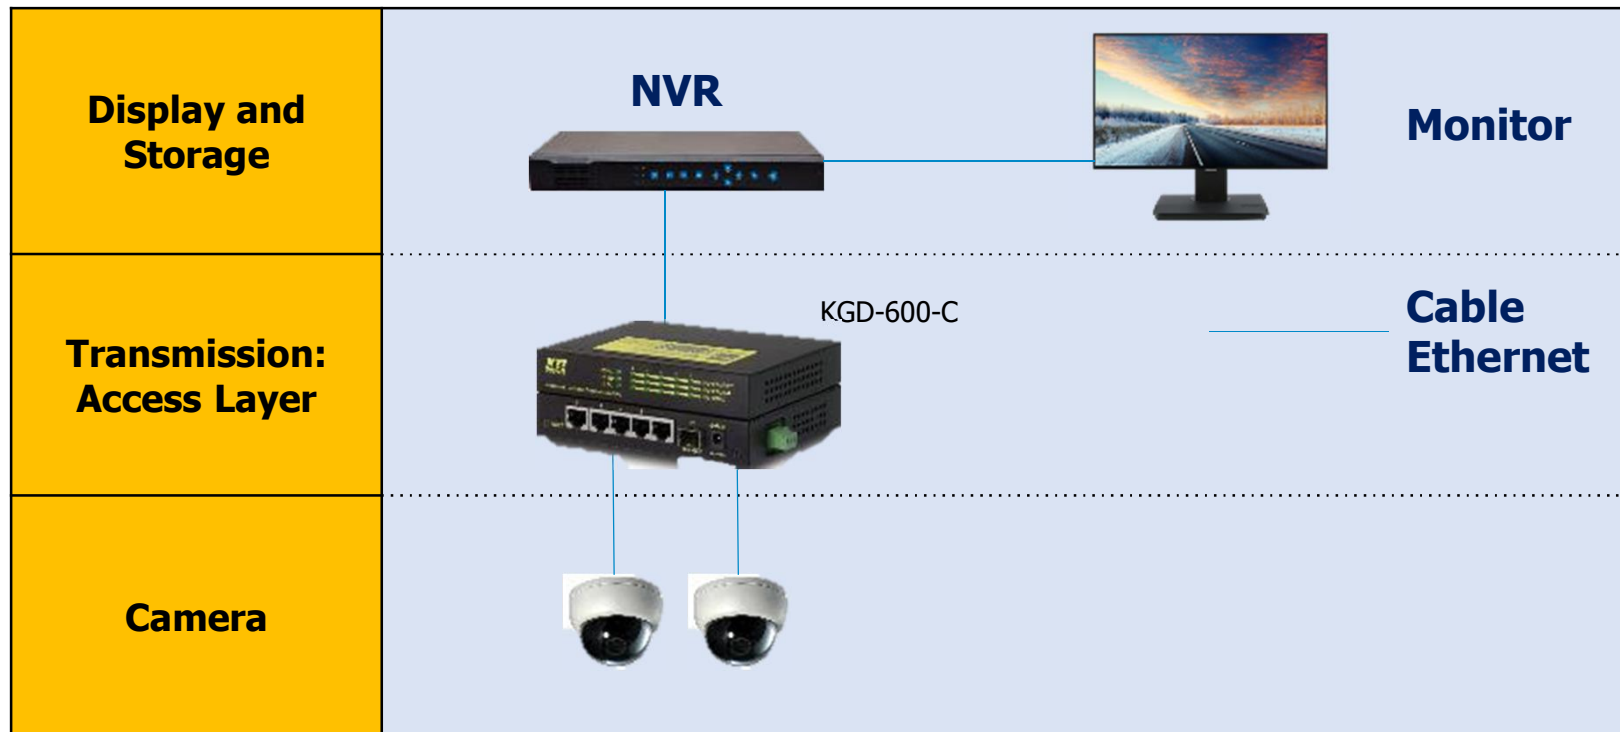

6. SWITCH EXAMPLES

6. EXAMPLE SWITCH

6.1 Example 1

Small installation with a solution of <20 IPC's

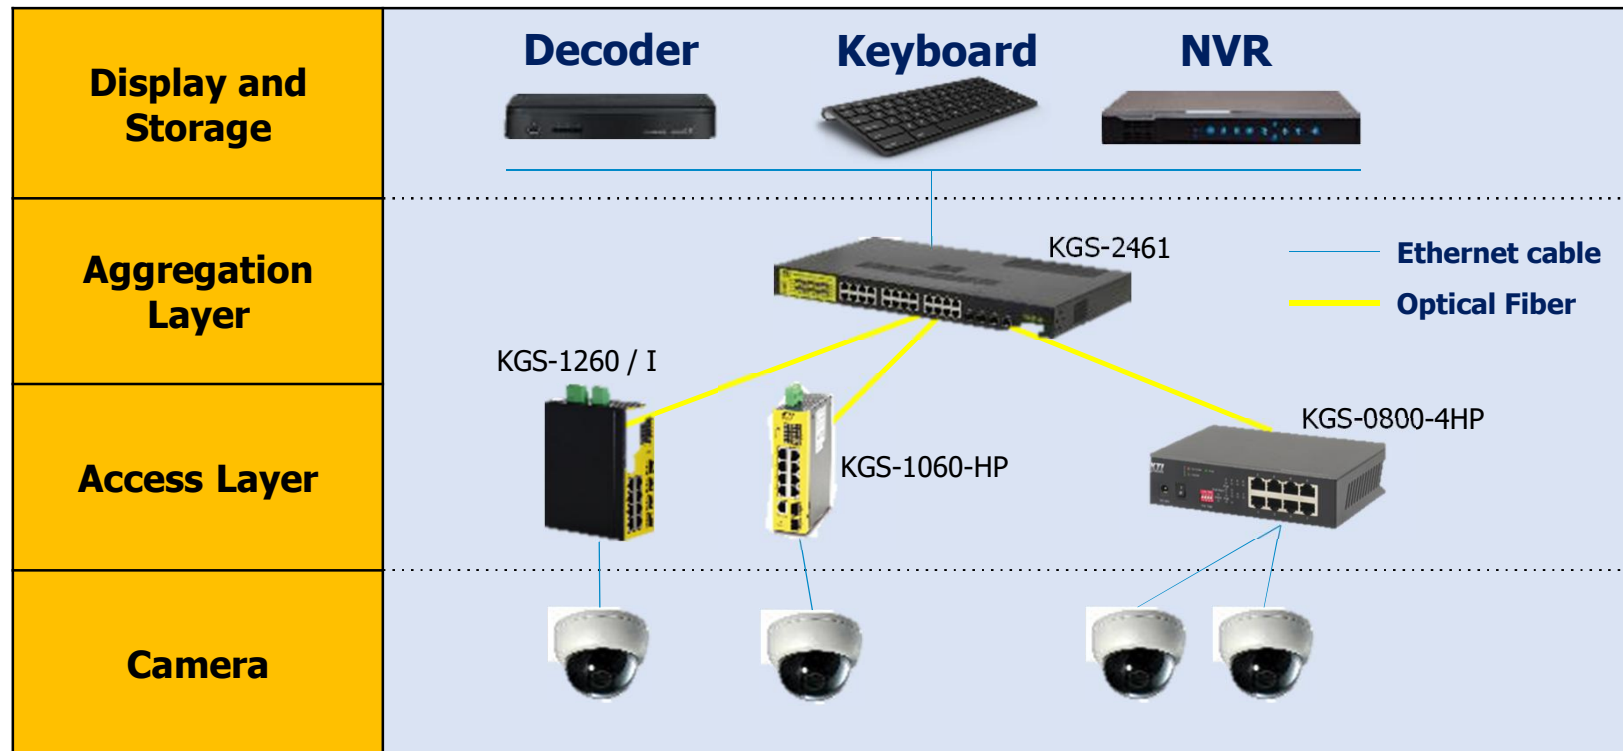

6. EXAMPLE SWITCH

6.2 example 2

Small installation with a solution of 50 to 100 IPC's
